ALCATEL onetouch.

Table of Contents

This product meets applicable national SAR limits of 2.0 W/kg. The specific maximum SAR values can be found on page 7 of this user guide.

When carrying the product or using it while worn on your body, either use an approved accessory such as a holster or otherwise maintain a distance of 1.5 cm from the body to ensure compliance with RF exposure requirements. Note that the product may be transmitting even if you are not making a phone call.

Safety and use......................

We recommend that you read this chapter carefully before using your phone. The manufacturer disclaims any liability for damage, which may result as a consequence of improper use or use contrary to the instructions contained herein.

• TRAFFIC SAFETY:

Given that studies show that using a mobile phone while driving a vehicle constitutes a real risk, even when the hands-free kit is used (car kit, headset...), drivers are requested to refrain from using their mobile when the vehicle is not parked.

When driving, do not use your phone and headphone to listen to music or to the radio. Using a headphone can be dangerous and forbidden in some areas.

When switched on, your phone emits electromagnetic waves that can interfere with the vehicle's electronic systems such as ABS anti-lock brakes or airbags. To ensure that there is no problem:
- do not place your phone on top of the dashboard or within an airbag deployment area,
- check with your car dealer or the car manufacturer to make sure that the dashboard is adequately shielded from mobile phone RF energy.

• CONDITIONS OF USE:

You are advised to switch off the telephone from time to time to optimise its performance.

Switch the phone off before boarding an aircraft.

Switch the phone off when you are in health care facilities, except in designated areas. As with many other types of equipment now in regular use, mobile telephones can interfere with other electrical or electronic devices, or equipment using radio frequency.

Switch the phone off when you are near gas or flammable liquids. Strictly obey all signs and instructions posted in a fuel depot, petrol station, or chemical plant, or in any potentially explosive atmosphere.

When the phone is switched on, it should be kept at least 15 cm from any medical device such as a pacemaker, a hearing aid or insulin pump, etc. In particular when using the phone, you should hold it against the ear on the opposite side to the device, if any.

To avoid hearing impairment, pick up the call before holding your phone to your ear. Also move the handset away from your ear while using the "hands-free" mode because the amplified volume might cause hearing damage.

Do not let children use the phone and/or play with the telephone and accessories without supervision.

When replacing the cover please note that your phone may contain substances that could create an allergic reaction.

Always handle your phone with care and keep it in a clean and dust-free place.

Do not allow your phone to be exposed to adverse weather or environmental conditions (moisture, humidity, rain, infiltration of liquids, dust, sea air, etc). The manufacturer's recommended operating temperature range is -10°C to +55°C.

At over 55°C the legibility of the phone's display may be impaired, though this is temporary and not serious.

Emergency call numbers may not be reachable on all cellular networks. You should never rely only on your phone for emergency calls.

Do not open, dismantle or attempt to repair your mobile phone yourself.

Do not drop, throw or bend your mobile phone.

Do not paint it.

Use only batteries, battery chargers, and accessories which are recommended by TCT Mobile Limited and its affiliates and are compatible with your phone model. TCT Mobile Limited and its affiliates disclaim any liability for damage caused by the use of other chargers or batteries.

Remember to make back-up copies or keep a written record of all important information stored in your phone.

Some people may suffer epileptic seizures or blackouts when exposed to flashing lights, or when playing video games. These seizures or blackouts may occur even if a person never had a previous seizure or blackout. If you have experienced seizures or blackouts, or if you have a family history of such occurrences, please consult your doctor before playing video games on your phone or enabling a flashing-lights feature on your phone.

Parents should monitor their children's use of video games or other features that incorporate flashing lights on the phones. All persons should discontinue use and consult a doctor if any of the following symptoms occur: convulsion, eye or muscle twitching, loss of awareness, involuntary movements, or disorientation. To limit the likelihood of such symptoms, please take the following safety precautions:

- Do not play or use a flashing-lights feature if you are tired or need sleep.
- Take a minimum of a 15-minute break hourly.
- Play in a room in which all lights are on.
- Play at the farthest distance possible from the screen.
- If your hands, wrists, or arms become tired or sore while playing, stop and rest for several hours before playing again.
- If you continue to have sore hands, wrists, or arms during or after playing, stop the game and see a doctor.

When you play games on your phone, you may experience occasional discomfort in your hands, arms, shoulders, neck, or other parts of your body. Follow the instructions to avoid problems such as tendinitis, carpal tunnel syndrome, or other musculoskeletal disorders.

Prolonged exposure to music at full volume on the music player may damage the listener's hearing.

Set your phone volume safely. Use only headphones recommended by TCT Mobile Limited and its affiliates.

PRIVACY:

Please note that you must respect the laws and regulations in force in your jurisdiction jurisdiction(s) where you will use your mobile phone regarding taking photographs and sounds with your mobile telephone. Pursuant to such laws and regulations, it forbidden to take photographs and/or to record the voices of other people or any of them, and duplicate or distribute them, as this may be considered to be an inva the user's sole responsibility to ensure that prior authorisation be obtained, if ne order to record private or confidential conversations or take a photograph of another manufacturer, the seller or vendor of your mobile phone (including the operator liability which may result from the improper use of the mobile phone.

BATTERY:

Before removing the battery from your phone, please make sure that the phone is s Observe the following precautions for battery use:

- Do not attempt to open the battery (due to the risk of toxic fumes and burns).
- Do not puncture, disassemble or cause a short-circuit in a battery,
- Do not burn or dispose of a used battery in household rubbish or store it above 60°C.

Batteries must be disposed of in accordance with locally applicable environmental re use the battery for the purpose for which it was designed. Never use damaged batte not recommended by TCT Mobile Limited and/or its affiliates.

This symbol on your telephone, the battery and the accessories mea products must be taken to collection points at the end of their life:
- Municipal waste disposal centres with specific bins for these items of equi
- Collection bins at points of sale.

They will then be recycled, preventing substances being disposed of in the and their components can be reused.

In European Union countries:

These collection points are accessible free of charge.

All products with this sign must be brought to these collection points.

In non European Union jurisdictions:

Items of equipment with this symbol are not to be thrown into ordinary bins if your j your region has suitable recycling and collection facilities; instead they are to be tak points for them to be recycled.

CAUTION: RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT T DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS.

CHARGERS

Mains powered chargers will operate within the temperature range of: 0°C to 40°C. The chargers designed for your mobile phone meet with the standard for safety of in technology equipment and office equipment use. Due to different applicable electric a charger you purchased in one jurisdiction may not work in another jurisdiction. Th used for this purpose only.

•RADIO WAVES:

Proof of compliance with international standards (ICNIRP) or with European Directive 1999/5/EC (R&TTE) is required of all mobile phone models before they can be put on the market. The protection of the health and safety for the user and any other person is an essential requirement of these standards or this directive.

THIS DEVICE MEETS INTERNATIONAL GUIDELINES FOR EXPOSURE TO RADIO WAVES.

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves (radio frequency electromagnetic fields) recommended by international guidelines. The guidelines were developed by an independent scientific organization (ICNIRP) and include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.

The radio wave exposure guidelines use a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit for mobile devices is 2 W/kg.

Tests for SAR are conducted using standard operating positions with the device transmitting at its highest certified power level in all tested frequency bands. The highest SAR values under the ICNIRP guidelines for this device model are:

Maximum SAR for this model and conditions under which it was recorded.		
Head SAR	GSM 900+Wi-Fi+Bluetooth	1.3 W/kg
Body-worn SAR	GSM 900+Wi-Fi+Bluetooth	1.01 W/kg

During use, the actual SAR values for this device are usually well below the values stated above. This is because, for purposes of system efficiency and to minimize interference on the network, the operating power of your mobile device is automatically decreased when full power is not needed for the call. The lower the power output of the device, the lower its SAR value.

Body-worn SAR testing has been carried out at a separation distance of 1.5 cm. To meet RF exposure guidelines during body-worn operation, the device should be positioned at least this distance away from the body. If you are not using an approved accessory ensure that whatever product is used is free of any metal and that it positions the phone the indicated distance away from the body.

The World Health Organization has stated that present scientific information does not indicate the need for any special precautions for the use of mobile devices. They recommend that if you are interested in further reducing your exposure then you can easily do so by limiting your usage or simply using a hands-free kit to keep the device away from the head and body.

For more information you can go to www.alcatelonetouch.com

Additional information about electromagnetic fields and public health are available on the following site: http://www.who.int/peh-emf.

Your telephone is equipped with a built-in antenna. For optimal operation, you should avoid touching it or degrading it.

As mobile devices offer a range of functions, they can be used in positions other than against your ear. In such circumstances the device will be compliant with the guidelines when used with headset or usb data cable. If you are using another accessory ensure that whatever product is used is free of any metal and that it positions the phone at least 2cm away from the body.

•LICENCES

microSD Logo is a trademark.

	• Pick up/Send a call
	• Enter Call Log
	• Return to ongoing call screen if the user navigates to other applications during call.
	• On Home screen, press to quickly access **Settings** menu or Notification panel; to launch quick search; to customize your Home screen by adding applications or changing wallpaper/ theme.
	• On other screens, press to view options list.
	Short press: Return to the Home screen or back to the central Home screen if it is extended.
	Long press: Enter the recently used applications list.
	Go back to the previous menu or screen.
	Short press: End a call Lock the screen Light up the screen
	Long press: When phone is off, power on the phone. When phone is on, enter Phone options: Silent mode, Airplane mode, Power off.
	Press to adjust the Volume (in call/media playing mode)
	Open Search bar for searching within an application, the phone or web.

1.2 Getting started

1.2.1 Set-up

Removing or installing the back cover
Inserting or removing the SIM[1] card

You must insert your SIM card to make phone calls. Please pow phone and remove battery before inserting or removing the SIM
Place the SIM card with the chip facing downwards and slide it i housing. Make sure that it is correctly inserted. To remove the and slide it out.

[1] Check with your network operator to make sure that your SIM card is 1.8V compatible. The old 5 volt cards can no longer be used.

Installing or removing the battery
- Insert and click the battery into place, then close the phone cover.
- Unclip the cover, then remove the battery.

Installing and removing the memory card (MicroSD card)

To release the microSD card holder, slide it in the direction of the arrow and lift it. Then insert the microSD card with the golden contact downward. Finally, turn down the microSD holder and slide it in the opposite direction to lock it.

Charging the battery
Connect the battery charger.

- The **End** key's backlight will be lit up when charging a complet battery. After a while the light will go out and the phone can t switched on.
- Be careful not to force the plug into the socket.
- Make sure the battery is correctly inserted before connec charger.
- The mains socket must be near to the phone and easily access electric extension cables).
- When using your telephone for the first time, charge the batte (approximately 4 hours).

You are advised to fully charge the battery. Charging status i indicated by the depth of water on the lock screen. The depth in as the phone is charged.

To reduce power consumption and energy waste, whe is fully charged, disconnect your charger from the plug; sw Wi-Fi, GPS, Bluetooth or background-running applicatio not in use; reduce the backlight time, etc.

1.2.2 Power on your phone

Hold down the **End** key until the phone powers on, type in your PIN code if necessary and then confirm. The Home screen is displayed.

If you do not know your PIN code or if you have forgotten it, contact your network operator. Do not leave your PIN code with your telephone. Store this information in a safe place when not in use.

Set up your phone for the first time

The first time you power on the phone, you are required to touch the Android logo to begin and then sign into your Google account to synchronize email, contacts, calendar and other Google[1] applications
• Enter your user name and password, the touch **Sign in**. If you forget your password, you can go to http://www.google.com/ to retrieve. If you don't own a Google Account, you are prompted to create one by touching **Create**.

• Read the setup information on the screen.

• Mark/Unmark the check box to choose whether you want to take advantage of Google's location service, then touch **Next**.

• Set up the date and time, then touch **Next**.

• Touch **Finish setup**.

[1] Application availability depends on country and operator.

🔆 This initial set up can be skipped and enabled via **Settings\Accounts & sync**.

In power on screen without SIM card inserted, you can also connect a Wi-Fi network (refer to section **6.1.2 Wi-Fi**) to sign into your Google account and to use some features.

1.2.3 Power off your phone

Hold down the **End** key from the Home screen until the phone options appear, select **Power off**.

1.3 Home screen

You can bring all the items (applications, shortcuts, folders and widgets) you love or use most frequently to your Home screen for quick access. Press **Home** key to switch to Home screen.

Status bar
• Status/Notification indicators
• Touch and Drag down to open notification panel.

Search bar
Touch to enter text search screen.
Touch to enter voice search screen.

Touch an icon to open an application, folder, etc.

Touch to access **Messaging**

Application tab
Touch to open applications list.

Touch to access **Call log** if you have missed call(s), or access the tab you exit last time.

Home screen is provided in an extended format to allow more space for adding applications, shortcuts etc. Slide the Home screen horizontally left and right to get a complete view of the Home screen. Small dots at the lower left and right of the screen indicate which screen you are viewing.

Touch & hold the small dots or application tab can display the thumbnails of extended home screen, touch the thumbnail to open it. Press **Back** key or touch an empty area to return to Home screen. You can customize the number of home screens by **Settings** (refer to section **11.4 Sound & display**).

1.3.1 Using the touchscreen

Touch

To access an application, touch it with your finger.

Touch and Hold

To enter the available options for an item, touch and hold the item. For example, select a contact in Contacts, touch and hold this contact, options list will then appear on screen.

Drag

Place your finger on the screen to drag an object to another location.

Slide/Swipe

Slide the screen to scroll up and down the applications, images, web pages... at your convenience.

Flick

Similar to swiping, but flicking makes it move quicker.

Rotate

Automatically change the screen orientation from portrait to landscape by turning the phone leftward to have a better screen view.

1.3.2 Status bar

From status bar, you can view both phone status (to the right side) and notification information (to the left side). When the status bar is full, "↓" icon will appear, touch to display hidden icons. You can touch twice the status area on the Home screen to hide/show the Status bar.

Status icons

	GPRS connected		Speakerphone is on
	GPRS in use		Roaming
	GPRS is disabled		No signal
	EDGE connected		No SIM card installed
	EDGE in use		Vibrate mode
	EDGE is disabled		Ringer is silenced
	Connected to a Wi-Fi network		Phone microphone is mute
	Bluetooth is on		Battery is very low
	Connected to a Bluetooth device		Battery is low
	Airplane mode		Battery is partially drained
	Alarm is set		Battery is full
	Signal strength		Battery is charging
	GPS is on		Headset connected
	Receiving location data from GPS		

Notification icons

	New Gmail message		More notifications are hidden
	New text or multimedia message		Call in progress (green)
	Problem with text or multimedia message delivery		Call in progress using Bluetooth headset (blue)
	New Google Talk message		Missed call
	New voicemail		Call on hold
	Upcoming event		Call forwarding is on
	Data is synchronizing		Uploading data
	Problem with sign-in or synchronization		Downloading data
	microSD card is full		Download finished
	No microSD card installed		An open Wi-Fi network is available
	Connected to VPN		Phone is connected via USB cable
	Disconnected from VPN		Radio is on
	Song is playing		System update available

Notification panel

Touch and drag down the Status bar or press **Menu** key and touch **Notifications** to open the notification panel. Touch and drag up to close it. From Notification panel, you can open items and other reminders indicated by notification icons or view wireless service information.

Touch ⬚ to clear all event-based notifications (other ongoing notifications will remain).

1.3.3 **Search bar**

The phone provides a Search function which can be used to locate information within applications, the phone or the web.
Touch to search by voice
Touch to search by text
Search shortcuts history

Search by text

• Touch 🔍 from Home screen or press **Search** key from other applications screen.

• Enter the text/phrase you want to search for.

• Touch 🔍.

Search by voice

• Touch 🎤 from Search bar to display a dialog screen.

• Speak the word/phrase you want to search for. A list of search will display for you to select from.

1.3.4 **Lock/Unlock your screen**

To protect your phone and privacy, you can lock the phone creating a variety of patterns.

To create a screen unlock pattern (refer to section 11.5.2 for settings)

• Press **Menu** key from the home screen, touch **Settings**, t **Location & security\Screen unlock pattern**.

• Draw your own pattern, you can also press **Menu** key for help.
Draw your unlock pattern

Touch to confirm by drawing pattern again

To lock phone screen

Press **End** key once to lock the screen.

To unlock phone screen

Draw the unlock pattern you have created to wake up the screen. If you did not set the unlock screen, drag down the lock icon to unlock it.
1.3.5 Personalize your home screen

Add

Touch and hold an empty area or press **Menu** key and touch **Add** on the Home screen. The **Add to Home screen** will appear, offering a range of options.

- • **Shortcuts**   To add a shortcut to Home screen, such as applications, bookmark, contact, etc.
- • **Widgets**   To add a widget to Home screen, such as clock, music player, etc.
- • **Folders**   To add a folder to Home screen, such as new folder, contact folder, etc.

To improve the organization of the Home screen items (shortcuts, widgets), you can add them to a folder by touching and dragging to the folder of your choice. To rename a folder, open it, touch and hold folder's title bar to open the Rename folder dialog box, then enter folder name and confirm with **OK**.

Reposition

Touch and hold the item to be repositioned to activate the Move mode, drag the item to the desired position and then release. Hold the item at the left or right edge of the screen to drag the item to another Home screen page.

Remove

Touch and hold the item to be removed to activate the Move mode, drag the item to the top of the Application tab, which will then turn red, and release.

Wallpaper customization

Touch and hold an empty area or press **Menu** key and touch **Wallpaper** on the Home screen, a popup window named **Select wallpaper from** will appear, offering a range of options. **Pictures** includes those you have taken, cropped or downloaded. **Wallpaper gallery** includes preset wallpapers in the phone. Slide left and right to locate a desired image, touch **Set wallpaper** to confirm.

Theme customization

Touch and hold an empty area or press **Menu** key and touch **Theme** on the Home screen. You can access Themes gallery which includes preset themes in the phone. Slide left and right to locate a desired theme, touch **Set theme** to confirm.

1.3.6 Application tab

Touch on Home screen to enter applications list.

To return to the Home screen, press **Home** key.

Consult recently-used applications

To consult recently-used applications, you can press and hold the **Home** key from Home screen. Touch an icon in the window to open the related application.

1.3.7 Volume adjustment

Using volume key

Press **Volume up/down** key to adjust the volume. While in the lowest volume level (Silent mode), press **Volume up** key once, your phone will now be switched to Vibrate mode. Press **Volume down** key once in Vibrate mode and it will change to silent mode.

Using Settings menu

Press **Menu** key from Home screen, then touch **Settings\Sound & display**, you can set ringer, media and phone ringtone volume to your preference.

1.4 Applications list

The Application list contains all pre-embedded and newly installed applications.

To access the Applications list, touch Application tab from Home To return to Home screen, press **Home** key.

1.4.1 Normal mode and sort mode

Applications can be managed in two modes. To switch bet modes, press **Menu** key from applications list screen, and touc **mode**.

• **Normal mode (default)**   All applications are listed in alphabetical ord

• **Sort mode**   All applications are sorted by several categ

1.4.2 Categories management

There are 6 categories in total: 4 categories is predefined, 2 cat can be added.

Press **Menu** key, and select **Edit** to enter edit mode. Within edi you can now customize categories.

- **Rename a category** Locate the category you want to rename, touch to display option menu, then touch **Rename category**. When finished, touch **OK**.

- **Delete a category** Locate the category you want to remove, touch to display option menu, then touch **Delete category**.

- **Add a category** Press **Menu** key, then touch **Add category** to create a new category name. When finished, touch **OK**. You can select some applications to move into the new category, and confirm by touching **OK** again.

- **Move an application among categories** Locate the application you want to move, touch to display the categories list, then touch the desired category name.

2 Text input......................

2.1 Using Onscreen Keyboard

Onscreen keyboard will display automatically when a program entering text or numbers.

Touch to enter text or numbers, touch and hold for one or two seconds to select input method.

Touch to lock in capital letter input mode.

Long press to enter an accent of the letter.

Touch to switch to symbol and numeric keyboard.

Onscreen keyboard settings

Press **Menu** key from Home screen, select **Settings\Lang keyboard\Android keyboard**, a series of settings are availab selection.

Adjust the onscreen keyboard orientation

Turn the phone sideways or upright to adjust the onscreen orientation. You can also adjust it by settings (Press **Menu** key screen**Settings\Sound & display**).

2.2 Text editing

You can edit the text you have entered.

- Touch and hold text you have entered
- Options list pops up
- Select the operation you need (**Select all**, **Select text**, **Cut all**, **Co all**, etc.)

3 Phone call, Call log and Contacts ....

3.1 Phone ....

3.1.1 Placing a call

The user can easily start a call using **Phone**.

Enter this menu using one of the following two ways:
• Touch Application tab from Home screen and select **Phone**.
• Press **Call** key, then select **Phone** tab.

Touch and hold to access Voicemail

Touch and hold to add 2-sec pause
Touch to add to Contacts

Touch and hold to add wait

Enter the desired number from the keyboard directly or select a contact from **Contacts**, **Call log** or **Favorites** by touching tabs, then press **Call** key or touch to place the call. The number you entered can be saved to **Contacts** by pressing **Menu** key and touching **Add to Contacts** or touch.

If you make a mistake, you can delete the incorrect digits by touching

To hang up a call, press **End** key.

International call

To dial an international call, touch and hold to enter "+", then enter the international country prefix followed by the full phone number, finally touch or press **Call** key.

Emergency call

If your phone has network coverage, dial emergency number and press **Call** key or touch to make an emergency call. This works without a SIM card and without typing the PIN code.

3.1.2 Answering or rejecting a call

When you receive an incoming call, drag down the green phone or press **Call** key to answer. Hang up the call by pressing **End** key.

When you receive an incoming call, but don't want to answer, you decline it by dragging up the red phone icon. The caller is sent to your voicemail box to leave a message.

To mute the ringtone volume of an incoming call, press **Volume** key.

3.1.3 Calling your voicemail

Your voicemail is provided by your network to avoid missing calls. It works like an answering machine that you can consult at any time.

To access your voicemail, touch and hold on **Phone** tab.

To set your voicemail number, enter **Settings\Call settings\Voicemail settings**.

If you receive a voicemail, a voicemail icon appears on the Status bar. Open the Notification panel, touch **New voicemail**.

3.1.4 During a call

When a call is in progress, press **Menu** key to open the call options. Touch **Bluetooth** to switch between Bluetooth headset and the phone. To adjust the volume during a call, press **Volume Up/Down** key.

Touch to hold the current call. Touch this icon again to release the call.
Touch to mute the current call. Touch this icon again to unmute the call.
Touch to activate the speaker during the current call. Touch this icon again to deactivate the speaker.
Touch to access **Contacts** to view or call a contact.
Touch to end the current call.

3.1.5 Managing multiple calls

With this phone you can handle multiple calls at the same time.

Swap calls

When you accept two calls, press **Menu** key to open options, touch icon . You can also press **Call** key to switch between two lines. The current call is put on hold and you have joined in the other. Touch to hang up the call on hold.

Conference calls[(1)]

You can set up a conference call.

• Place a call to the first participant of the conference call.
• Press **Menu** key to display options list, touch icon
• Enter the phone number of the person you want to add to conference and press **Call** key. You can also add participants from **Contacts**, **log** or **Favorites**.
• Press **Menu** key again, then touch icon to start conference call.
• During a conference call, touch **Manage** to drop a participant or to talk privately to one of the participants. Touch to drop the participant from the conference, touch to talk privately to the participant and hold on other participants.
• Touch or press **End** key to end the conference call and disconnect all callers.

[(1)] Depending on your network operator.

3.2 Call log

You can access your call memory by touching from the Home screen or pressing **Call** key and touching **Call log** to the right side of contact/number to place a call directly. There are three kind of calls in Call log:

Missed calls

Dialled calls

Received calls

Touch or touch & hold a contact or number to view information or further operations.

You can view detailed information of a call, launch a new call or send message to a contact or number, or add number to **Contacts** (only available for phone numbers), etc.

To clear the entire call memory, press **Menu** key then touch **Clear call log**.

3.3 Contacts ....

Contacts enables quick and easy access to the people you reach.

You can view and create contacts on your phone and synchronise with your Gmail contacts or other applications on the web or on phone.

> When using **Contacts** for the first time you are required to new contacts, import contacts from SIM card (please section 3.3.5 for detailed information), or synchronize from other application accounts to your phone.

3.3.1 Consult your Contacts

To access the **Contacts**, touch **Application tab** on the Home then select **Contacts**. You can also access this feature by press then selecting the **Contacts** tab.

Touch to view the contact's detailed information.

Touch icon to open Quick Contact panel.

Touch to view your favorite contacts.

Touch and hold a contact to display its option menu.
You can also press **Menu** key to display contacts list option me

Following actions are enabled:

- **New contact**   Add new contact to phone.
- **Display options** Choose contacts to display, for example only contacts with phones, other application contacts if any, etc.
- **Accounts**   Manage the synchronization settings for different accounts.
- **Import/Export** Import or export contacts between phone, SIM card, and MicroSD card.
- **More\Sync**   Launch synchronization with the account you set.
- **More\Delete contacts** Select and delete unwanted contacts.
- **SIM contacts** Manage contacts stored in SIM card.

3.3.2 **Adding a contact**

Press **Menu** key from contacts list screen and touch **New cont**

You are required to enter the contact's name and other contact information. By scrolling up and down the screen, you can move field to another easily.

Touch to select a picture for the contact.

Touch to unfold the other predefined labels of this categ

Touch to add other new labels to this category.

Touch to delete the selected label.

Touch to open a menu with preset labels.
When finished, touch **Done** to save.

To add a contact to favorites, touch and hold a contact to contact's option menu, then touch **Add to Favorites**. Or you c touch a contact to view details then touch to add the contact t favorites (the star will turn gold in color).

To remove a contact from favorites, select **Remove from Fav** the contact's option menu or touch gold star on contact details scree

3.3.3 **Editing your contacts**

To edit contact information, touch and hold the contact whose information is to be edited, then touch **Edit contact**. When finished, touch **Done**.

Change a contact's default phone number

The default phone number (the number which has priority when making a call or sending a message) will always be displayed under the contact name.

To change the default phone number, touch and hold the number you want to set as the default number from the contact's details screen, then select **Make default number**, appears after the number.

Divert calls to voicemail/Set ringtone for a contact

On the contact's detail screen, press **Menu** key to display contacts list option menu, and touch **Options**, then select **Incoming calls** or **Ringtone**.

When one contact has been set to send calls directly to voicemail, if he/she calls, your phone doesn't ring and the caller will be sent directly to your voicemail.

Delete a contact

To delete a contact, press **Menu** key and touch **Delete contact** from contact details screen or directly touch & hold a contact from Contacts screen to display contacts list option menu then touch **Delete contact**. Touch **OK** to confirm.

> The contact you have deleted will also be removed from other applications on phone or web the next time you synchronize your phone.

3.3.4 **Communicating with your contacts**

From the contacts list, you can communicate with your contacts by call or exchanging messages.

To launch a call to a contact, locate the contact or number your call, then press **Call** key or touch. You can also touch & hold the contact or number, then touch **Call contact**.

To send a message to a contact, touch & hold the contact or number you want to send a message to, then touch **Text contact**. You can touch to the right side of the contact from contact details screen.

Use Quick contact for Android

Touch a contact's picture to open Quick Contact for Android, you touch the icon for the way you want to connect.

> The icons available on Quick contact bar depend on the information you have for the contact and the applications and accounts on your phone.

3.3.5 Contacts importing, exporting and sharing

This phone enables you to import contacts from SIM card/MicroSD card and export contacts to a MicroSD card which can then be used to back up your information.

From Contacts screen, press **Menu** key to open contacts list options, touch **Import/Export**, then select **Import from SIM card**, **Import from SD card, Export to SD card** or **Export to SIM card**.

To import/export a single contact from/to SIM card, touch the contact you want to import/export, then press **Menu** key and touch **OK** to confirm.

To import/export all contacts from/to SIM card, mark **Select all contacts** check box, then press **Menu** key and touch **OK** to confirm.

You can share a contact with others by sending the contact's vCard to them via Bluetooth, MMS, Email, etc.

Touch a contact you want to share, press **Menu** key and touch **Share** from contact details screen, then select the application to perform this action.

3.3.6 Displaying contacts

You can configure which groups of contacts, for each account, you want to display in the Contacts list. To hide/display contacts that don't have phone numbers, press **Menu** key from contacts list screen, touch **Display options**, then activate or deactivate **Only contacts with phones** by touching it. Finally, touch **Done** to save.

3.3.7 Joining/Separating contacts

To avoid duplication, you can add any new contact information to existing contacts in a single action.

Touch the contact which you want to add information to, press **Menu** and touch **Edit contact**, then press **Menu** key again and touch **Join**.

At this time, you are required to select the contact whose information you want to join with the first contact. The information from the second contact is added to the first one, and the second contact will no longer be displayed in the Contacts list.

To separate contact information, touch the contact whose information you want to separate, press **Menu** key and touch **Edit contact**, press **Menu** key again and touch **Separate**.

3.3.8 Accounts

Contacts, data or other information can be synchronized from multiple accounts, depending on the applications installed on your phone.

To add an account, press **Menu** key from Contacts list, touch **Accounts**, then touch **Add account** tab; or access it by pressing **Menu** key from Home screen, touch **Settings**, then selecting **Accounts & sync**, finally touching **Add account** tab.

You are required to select the kind of accounts to add, like Google, Facebook, etc.

As with other account set-ups, you need to enter detailed information, like username, password, etc.

You can remove an account to delete it and all associated information from the phone.

Open the **Accounts & sync settings** screen, touch the account you want to delete, then touch **Remove account** and confirm.

Useful icons:

Indicates that the account is configured to synchronize automatically with your phone.

Indicates that the account is not configured to synchronize automatically with your phone.

Background data

Activate or deactivate **Background data** to control whether applications or services data can be transmitted when they are running in the background. Applications can synchronize, send, and receive data at any time if activated.

For example, if deactivated, Gmail will stop receiving new emails until you touch the **Refresh** or send an email.

Auto-sync

When activated, all changes to information on the phone or online will be automatically synchronized to each other.

Sync manually

You can synchronize an account manually on **Accounts & Sync Settings** screen, and you must touch an account in the list on this screen, press **Menu** key and touch **Sync now**.

4 Google Messaging, Gmail/Email, Google Talk and Google Voice ....

4.1 Google Messaging ....

You can create, edit and receive SMS and MMS with this mobile.

To access this feature, touch Application tab from Home screen, select **Messaging**.

4.2 Gmail/Email

The first time you set up your phone, you can select to use an existing Gmail or to create a new Email account.

4.2.1 Gmail...

As Google's web-based email service, Gmail is configured when you first set up your phone. Gmail on your phone can be automatically synchronized with your Gmail account on the web. Unlike other kinds of email account, each message and its replies in Gmail are grouped in your inbox as a single conversation; all emails are organized by labels but not by folders.

To access Gmail

From Home screen, touch the Application tab to enter the applications list, then touch **Gmail**.

Gmail displays messages and conversations from one single Gmail account at a time, if you own more than one account, you can switch to another by pressing **Menu** key from Inbox screen, touching **Accounts**, then touching the account your want to view.

To create and send emails

• Press **Menu** key from Inbox screen, and touch **Compose**.
• Enter recipient(s)'s email address in **To** field, and if necessary, press **Menu** key and touch **Add Cc/Bcc** to include a copy or a blind copy to the message.
• Enter the subject and content of the message.
• Press **Menu** key, touch **Attach** to send an attachment to the receiver.
• Finally, touch **Send**.
• If you do not want to send the mail out right away, you can touch **Save as draft** to save copy. To view the draft, press **Menu** key and touch **View labels**, then select **Drafts**.

If you do not want to send or save the mail, you can touch **Disc**

To add a signature to emails, press **Menu** key from inbox, touch **Settings**, then select **Signature**.

To delete:

• Touch and hold the VPN you want to delete, in the dialog that touch **Delete network**.
• Touch **OK** to confirm.

7 Android Market⁽¹⁾ ....

Android Market is an online software store, where you can download and install applications and games to your Android Powered Phone.

To open Android Market:

• Touch Application tab from Home screen, and then touch **Market**

• For the first time you access Android Market, a screen with terms of service pops up for your attention, touch **Accept** to continue.

Press **Menu** key, then touch **Help** to enter Android Market help page for more information on this function.

7.1 Locate the item you want to download and install

Android Market home page provides several ways to find applications. It showcases applications and games in categorized listings, and a link to all your downloads.

Touch **Apps** or **Games** on Android Market screen to browse contents, and then select subcategory. Within each subcategory, select to view items sorted by **Top paid**, **Top free**, or **Just in**.
Touch to search in Android market.

To return to Android Market Home screen, do one of the following:

• Touch the Market icon to the top left of the screen.

• Press **Menu** key to display options list, then touch **Home**.

7.2 Download and install

To download & install:

• Navigate to the item you want to download, and select the details screen from which you can read its overall rating or comments, view developer's information, etc.

• Press **Menu** key and touch **Security** to preview the functions and the application can access on your phone if you install it.

• Touch **Install**.

Be especially cautious with applications that have access to many functions or to a significant amount of your data. Once you touch **OK** to continue, you are responsible for the results of using this item on your phone.

- To check the progress of the download, open the Notification panel. To stop the downloading of the item, touch the progress bar and **Cancel download** on the screen that opens.
- After download and installation have finished, you will see a notification icon 🅱 on the status bar.

To open the application you have downloaded:

- On Android Market screen, touch **Downloads**.
- Touch the installed application in the list, then touch **Open**

To buy an application

On Android Market, some applications are labeled as free, while some of them are to be paid for before downloading and installing.

- Touch the application you want to buy.
- Touch **Buy** on the bottom of the screen.
- When making your first purchase, you are prompted to log in to Google Checkout payment and billing service.
- If your Google Checkout account has multiple credit card accounts, select one to proceed.
- Select the Terms of service link and read the document. When finished, press **Back** key.
- Mark the check box if you agree with the terms of service.
- Touch Buy now at the bottom of the screen.

When finished, Android downloads the application.

To request a refund

If you are not satisfied with the application, you can ask for a refund within 24 hours of the purchase. Your credit card will not be charged and the application will be removed. If you change your mind, you can install the application again, but you will not be able to request a refund.

- Touch **My downloads** in Android Market Home.
- Touch the application that you want to uninstall.
- Touch **OK** in the **Uninstall & refund** dialog box. If the dialog box not appear, your trial period has expired.
- In the survey form, select the answer that best matches your reason and touch **OK**.

7.3 Manage your downloads

After you downloaded and installed an application, the following operations are available for your selection.

View

9 Google Maps.............

9.1 Get My Location

9.1.1 Choose a data source to decide My Location

Press **Menu** key from Home screen, touch **Settings\Location**

• Mark the check box **Use wireless networks** to set Wi-Fi and/ mobile networks as My Location data source.

• Or mark the check box **Use GPS satellites** to set GPS as Location data source.

9.1.2 Open Google Maps and view My Location

Touch Application tab from Home screen, then touch **Maps**.

Press **Menu** again and touch **My Location**.

The map will then center on a blue dot with a blue circle around actual position is within the blue circle.

To move the map, drag the map with your finger.

To zoom in and out of a map, touch the plus or minus side of the zoom control ⊖ ⊕, or you can also zoom in/out by double-tapping a location on screen.

To clear the map history, press **Menu** key and touch **More\Clear Map**.

9.2 Search for a location

• While viewing a map, press **Menu** key and touch **Search**, or you can directly press **Search** key on keyboard to activate search function.
• In the search box, enter an address, a city or a local business.
• Touch the search icon and in a while your search results will appear on the map highlighted by markers with letter labels.

You can touch a marker to open a balloon that contains a label. Touch the balloon to open a screen with more handy information about the location.

9.3 Star a location

Just like bookmarking a web address on the Internet, you position on the map for later use.

9.3.1 How to star (or unstar) a location

• Touch & hold a location on a map
• Touch the address rectangle that opens
• Touch the gray star at the top of the screen to star the location touch a gold star to unstar that location.)
9.3.2 View a list of starred items

• Press **Menu** key from maps screen and touch **More\Starred it**
• The list of your starred items and their addresses opens.
• Touch a location in the list to view it .

Press **Menu** key and touch **Refresh** to update the list.

9.4 Get driving, public transport or walking directions

9.4.1 Get suggested routes for your trip

• Press **Menu** key from maps screen and touch **Directions**.

• Touch enter bar 🔲 to edit your start point by one of the following methods: entering an address, using My Location, selecting a start point on a map, selecting a starred item, selecting an address from your contacts or using search history.

• Do likewise for your end point.

• To reverse directions, **Menu** key and touch **Reverse Start & End**.

• Then select a transport mode: driving by car, using public transport, or walking directions.

• Finally touch **Go**.

• A couple of suggested routes will appear in a list. Touch any routes to view their respective detailed directions.

To get reverse directions for a route you've already made, simply open that route's directions window and select **Reverse**. No need to enter your start point and end point again.

9.4.2 Preview suggested routes and decide on a route more preferable or feasible to you

You can preview each turn in your route in Navigation, Satellite, other views.

• Touch a left or right arrow to preview the next or previous leg of your route.

• You can view turn-by-turn directions in a list 🔲 by touching, or pressing **Back** key to return to previous view.

When selecting a more preferable or feasible route, distance will be the two most important factors for your evaluation. Distance and estimated time will be displayed at the top of the directions screen.

9.4.3 Search for locations along your route

Please refer to section 9.2 for detailed information.

9.4.4 View route progress and calculate estimated arrival time

To view your route progress, pinpoint My Location, zoom out until the whole route goes into one screen, with both finished and unfinished parts in sight.

Start another Directions screen based on your current and destination locations. Estimated arrival time will be shown in the to enter.
Please note that the estimated arrival time is not available for the public transport mode.

9.4.5 View traffic conditions on your route

At the lower-left corner of navigation view, a traffic light indicates the overall traffic conditions on your route, next to the estimated time of arrival at your destination. You can also view the traffic conditions on each segment of your route.

Touch the traffic light at the lower left of the Navigation View. Your route opens in Traffic View, with color coding to indicate the traffic along the way. Touch the navigation icon to return to your current location in Navigation View

9.4.6 Get an alternative route to your destination

If traffic is slow on your current route, or if you just want to try a different route, you can request an alternative route from Google Maps with turn-by-turn Navigation service.

Press **Menu** key and touch **Route information**. Touch the alternative route icon. An alternative route is drawn on the map.

9.5 Arrangement of Layers

Layers allow you to view locations and additional information overlaid on the map. You can add multiple layers or remove only certain layers so you control exactly what information you want visible on the map at one time.

9.5.1 To view multiple layers

• Press **Menu** key from maps screen.
• Touch **Layers**.
• All available layers are listed (like Traffic, Satellite, Latitude, etc), select one to view.

You have to configure your own sync-hosting server account and the synchronization source at the other side. Also you might be asked to decide on the following options:

Who to sync: account name, username and password are used to authenticate your identity

How to sync: available synchronization types are two-way sync, backup to server, restore from server, export to server, and import from server

What to sync: supported synchronization applications are Contacts, Calendar, each with an independent secure database that denies anonymous access

When to sync: synchronize when roaming, synchronize when data modified, synchronize when phone is turned on or synchronize at regular basis (daily, weekly, and monthly)

10.7 TSCalibration

Follow the onscreen guide to go through the process: touch the start to continue. Touch green circle several times. When finished, touch OK. Press **Back** key to quit.

10.8 Radio

Your phone is equipped with a radio[1] with RDS[2] functionality. You can use the application as a traditional radio with saved channels or with parallel visual information related to the radio program on the display if you tune to stations that offer Visual Radio service.

To access this function, touch Application tab from Home screen, then touch **Radio**.

💡 To use it, you must plug in your headset, which works as an antenna connected with your phone.

Touch to search for all available stations automatically

Touch to play/stop

Touch to open and view the saved channels list

Touch to increase 0.5MHz

Touch and hold to search and go to the nearest higher frequency channel

87.5 FM MHz

Touch to add the current station to favorites.

Touch to go to next saved channel

Touch to decrease 0.5MHz

Touch and hold to search and go to the nearest lower frequency channel

Touch to go to previous saved channel

Available options:

• **Save channel**	Save the current tuned station to the chann
• **Edit name**	Edit the channel name.
• **Audio mode**	Listen to the radio using loudspeaker or hea
• **Exit**	Turn off the radio.
• **Enter frequency**	Enter the frequency manually.
• **Settings**	Customize radio settings according to preference.
• **Delete**	Delete the channel

10.9 Data limiter

To access this function, touch Application tab from Home screen, touch **Data limiter**.

Data limiter is an application which manages the volume of da pre-defined time period which can then be reset. It blocks all da the limit value is reached. Before using **Data limiter**, please er SIM card is correctly inserted.

---

(1) The quality of the radio depends on the coverage of the radio station in that particular area.
(2) Depending on your network operator and market.

10.10 Other applications[(1)]

The previous applications in this section are preinstalled to your phone. To read a brief introduction of the preinstalled 3rd party applications, please refer to the leaflet provided with the phone. You can also download thousands more 3rd party applications by going to Android Market on your phone.

---

11 Settings.......................

To access this function, touch Application tab from Home touch **Settings** on applications list, or you can also press **Menu** Home screen and touch **Settings**.

11.1 Wireless & networks

11.1.1 Airplane mode

Mark the check box of **Airplane mode** to simultaneously wireless connections including Wi-Fi, Bluetooth and more.

11.1.2 Wi-Fi

Using Wi-Fi you can now surf the Internet without using your SIM whenever you are in range of a wireless network. The only thing to do is to enter the **Wi-Fi settings** screen and configure an ac to connect your phone to the wireless network.

For detailed instructions on using Wi-Fi, please refer to se **Wi-Fi**.

11.1.3 Bluetooth

Bluetooth allows your phone to exchange data (videos, im and more) over short distances with another Bluetooth support (phone, computer, printer, headset, car kit and more).

For more information on Bluetooth, please refer to section **6.3 Connecting to Bluetooth devices**.

11.1.4 VPN settings

A mobile virtual private network (mobile VPN or mVPN) provides mobile devices with access to network resources and software applications on their home network, when they connect via other wireless or wired networks. Mobile VPNs are used in environments where workers need to keep application sessions open at all times, throughout the working day, as the user connects via various wireless networks, encounters gaps in coverage, or suspend-and-resumes their devices to preserve battery life. A conventional VPN cannot survive such events because the network tunnel is disrupted, causing applications to disconnect, time out, fail, or even the computing device itself to crash.

For more information of VPN, please refer to section **6.5 Connecting to virtual private networks**.

11.1.5 Mobile networks

Data enabled

If you do not need to transmit data on all mobile networks, unmark the check box of **Data enabled** to avoid incurring significant charges for data use on local carrier mobile networks, particularly if you do not have a mobile data agreement.

Data roaming

If you don't need to transmit data on other carriers' mobile networks, unmark the check box of **Data roaming** to avoid incurring significant roaming charges.

Access Point Names

Touch to enter Access Point Names list, where you can check the data connection you are using. You can also add/delete/edit an APN (refer to section 6.1.1 GPRS/EDGE)

(1) Availability depending on your country and network operator.

Network operators

Touch to select a network operator.

11.2 Call settings

Use Call settings to configure normal phone call settings and other features offered by your carrier. You can also use Call settings to configure the phone so that it can place outgoing calls only to a fixed set of phone numbers.

11.2.1 Fixed Dialing Numbers

Fixed Dialing Number (FDN) is a service mode of SIM, where outgoing calls are restricted to a set of phone numbers. These numbers are added to the FDN list. The most common practical application of FDN is for parents to restrict the phone numbers to which their children can dial.

For security reasons, you'll be prompted to enable FDN by entering SIM PIN2 which is usually acquired from your service provider or SIM maker.

11.2.2 Service Dialing Numbers

Service Dialing Numbers (SDN) is a service mode of SIM, where you can place the call from the SDN list. These built-in numbers are added in the SDN list by operator.

11.2.3 Voicemail

Voicemail service

Opens a dialog where you can select your carrier's voicemail service or another service.

Voicemail settings

If you are using your carrier's voicemail service, this opens a dialog where you can enter the phone number to use for listening to and managing your voicemail. You can enter a comma (,) to insert a pause into the number—for example, to add a password after the phone number.

11.2.4 Other call settings[(1)]

Call forwarding

Touch to configure how your calls are forwarded when you are busy, unanswered or unreachable.

Call barring

Touch to configure Call barring settings. Mark the check box to activate the call barring for outgoing and incoming calls.

Call cost

Touch to view the **Last call cost/Total cost/Max cost/Reset call cost/Currency and unit price**, modify or reset them.

Additional settings

- **Caller ID** Opens a dialog where you can set whether your phone number is displayed when making calls.
- **Call waiting** Mark the check box to notify you of a new incoming call.
- **Call waiting status** Opens a dialog where you can check call waiting status information.

11.2.5 Cell broadcast/Cell broadcast settings

Enable receipt of CB messages by marking the check box **Cell broadcast**.

You can access a series of adjustable CB settings by touching **Cell broadcast settings**.

[(1)] Availability depending on your country and network operator.

11.3 Sound & display

Use the Sound & Display settings to configure many aspects of call and notification ringtones, music, and other audio, as well as brightness and other screen settings.

Sound settings

- **Silent mode**   Mark the check box to silence all sounds except media & alarms.

- **Ringer volume**   Touch to set volume for incoming calls and notifications.

- **Media volume**   Touch to set volume for music and videos.

- **Phone ringtone**   Touch to set your default incoming call ringtone.

- **Phone vibrate**   Mark the check box to vibrate phone for incoming calls.

- **Notification ringtone**   Touch to set your default notification ringtone.

- **Audible touch tones**   Mark the check box to enable playing tones when using dial pad.

- **Audible selection**   Mark the check box to enable playing sound when making screen selection.

- **Haptic feedback**   Mark the check box to activate vibration when pressing soft keys and on certain UI interactions.

- **SD card notifications**   Mark the check box to activate playing sound for MicroSD card notifications.

Display settings

- **Orientation**   Mark the check box to activate automatic orientation switch when rotating phone.

- **Animation**   Touch to show all window animations.

- **Brightness**   Touch to adjust the brightness of the screen

- **Screen timeout**   Touch to set screen timeout.

- **Number of home screens**   Touch to set the **Number of home screens**

11.4 Location & security

Use the Location & Security settings to set your preferences for using and sharing your location when your search for information and use location-aware applications, such as Google Maps. You can also configure settings that help secure your phone and its data.

11.4.1 My Location

Use wireless networks

Mark the check box to use information from Wi-Fi and mobile networks to determine your approximate location, for use in Google Maps, when you search, and so on. When you select this option, you're asked whether you consent to sharing your location anonymously with Google's location service.

Use GPS satellites

Check to use your phone's global positioning system (GPS) satellite receiver to pinpoint your location within an accuracy as close as several meters ("street level"). The process of accessing the GPS satellite and setting your phone's precise location for the first time will require up to 5 minutes. You will need to stand in a place with a clear view of the sky and avoid moving. After this, GPS will only need 20-40 seconds to identify your precise location.

11.4.2 Screen unlock pattern

Set unlock pattern Touch to open a set of screens that gui through drawing a screen unlock pattern.

• **Require pattern** Mark the check box to set the requirem draw a pattern when unlocking screen

• **Use visible pattern** Mark the check box to draw lines between p in the unlock pattern you draw.

• **Use tactile feedback** Mark the check box to have the phone briefly as you touch each dot when you draw unlock pattern.

11.4.3 SIM card lock

Set up SIM card lock

Opens a screen where you can configure the PIN required phone, and where you can change the SIM PIN.

11.4.4 Passwords

Visible passwords

Mark the check box to show password as you type.

11.4.5 Credential storage

Use secure credentials

Mark the checkbox to allow applications to access your phone's encrypted store of secure certificates and related passwords and other credentials. Credential storage is used to establish some kinds of VPN and Wi-Fi connections. If you have not set a password for the credential storage, this setting is dimmed.

Install from SD card

Touch to install encrypted certificates from the MicroSD card.

Set password

Touch to set a password for the credential storage (at least 8 characters).

Clear storage

Touch to clear credential storage of all contents and reset its password.

11.5 Applications

You use the Applications settings to view details about the applications installed on your phone, to manage their data and force them to stop, and to set whether you want to permit installation of applications that you obtain from web sites and email.

Unknown sources

Mark the check box to permit installation of applications that you obtain from web sites, email, or other locations other than Android Market.

To protect your phone and personal data, download applications only from trusted sources, such as Android Market.

Manage applications

Touch to manage and remove installed applications.

Running services

Touch to open a list of services—applications or parts of applications that provide services to other applications, or that run even when their main application isn't running. Examples include the Android keyboard and the small portion of Google Talk that always listens for incoming messages. Above each service, one or more gray bars show what processes the running service needs and how much memory it's using (how much memory you would recover if you stopped the service). Depending on the service, when you touch it in the list it either opens a dialog in which you can stop it or opens its Settings screen.

Development

The Development screen contains settings that are useful for developing Android applications. For full information, including documentation of the Android applications and development tools, see the Android developer web site (http://developer.android.com).

• **USB debugging**: mark the check box to permit debugging tools on a computer to communicate with your phone via a USB connection.

• **Stay awake**: mark the check box to prevent the screen from dimming and locking when the phone is connected to a charger or to a USB device that provides power. Don't use this setting with a static image on the phone for long periods of time, or the screen may be marked with that image.

• **Allow mock locations**: mark the check box to permit a development tool on a computer to control where the phone believes it is located, rather than using the phone's own internal tools for this purpose.

11.6 Accounts & sync

Use the Accounts & Sync settings to add, remove, and manage your Google and other supported accounts. You also use these settings to control how and whether all applications send, receive, and synchronize data on their own schedules, and whether all applications can synchronize user data automatically.

Gmail, Google Calendar, and other applications may also have their own settings to control how they synchronize data; see the sections on those applications for details.

11.6.1 General sync settings

Background data

Mark the check box to permit applications to synchronize data in the background, whether or not you are actively working in them. Unmarking this setting can save battery power and lowers (but does not eliminate) data use.

Auto-sync

Mark the check box to permit applications to synchronize data on their own schedule. If you unmark this setting, you must touch an account in the list on this screen, press **Menu** key, and touch **Sync now** to synchronize data for that account.

Synchronizing data automatically is disabled if **Background data** is unchecked. In that case, the **Auto-sync** checkbox is dimmed.

11.6.2 Manage accounts

The rest of this screen lists the Google Accounts and other you've added to the phone. If you touch an account in the account screen opens.

This screen contains different options, depending on the kind of For Google Accounts, it lists the kinds of data you can synchron phone, with checkboxes so you can turn synchronizing on and You can also press **Menu** key and touch **Sync now** to syn data. Touch **Remove account** to remove the account along w data (contacts, mail, settings, and so on).

11.7 Privacy

You use the Privacy settings to manage your personal information.

Use My Location

Mark the check box to include your position when using Google Search and other Google services. When you check this option, you're asked whether you consent to allowing Google to use your location when providing these services.

Back up my settings

Mark the check box to back up your phone's settings to Google Servers, with your Google Account. If you replace your phone, the settings you've backed up are restored onto the new phone the first time you sign in with your Google Account. If you mark this option, a wide variety of settings are backed up, including your Wi-Fi passwords, bookmarks, a list of the applications you've installed, the words you've added to the dictionary used by the onscreen keyboard, and most of the settings that you configure with the Settings application. If you unmark this option, you stop backing up your settings, and any existing backups are deleted from Google Servers.

Factory data reset

Erase all of your personal data from internal phone storage, including information about your Google Account, any other accounts, your system and application settings, and any downloaded applications. Resetting the phone does not erase any system software updates you've downloaded or any files on your microSD card, such as music or photos. If you reset the phone in this way, you're prompted to re-enter the same kind of information as when you first started Android.

When you are unable to power on your phone, there is another perform a factory data reset by using hardware keys.

• Make sure your phone has been powered off.

• Hold down **Volume down** key and press **End** key at same tim the screen lights up.

• Press **Home** Key to access Android System Recovery screen.

• Press **Volume up\down** key to locate **wipe data/factory re** press **Menu** key to access factory data reset menu.

• Select **Yes-delete all user data**, then press **Menu** key wiping data from the phone.

• When finished, select **reboot system now**, then press **Menu** restart your phone.

11.8 SD card & phone storage

Use the MicroSD card & Phone Storage settings to monitor the u available space on your phone and on your MicroSD card; to ma MicroSD card; and if necessary, to reset the phone, erasin personal information.

11.8.1 SD card

Total space/Available space

Lists the amount of space on any MicroSD card installed in your phone and the amount you have used to store photos, videos, music, and other files.

Unmount SD card

Unmounts the MicroSD card from your phone so that you can format the card or safely remove it when the phone is on. This setting is dimmed if there is no MicroSD card installed, if you have already unmounted it, or if you have mounted the MicroSD card on your computer.

Format SD card

Permanently erases everything on a MicroSD card and prepares it for use with your phone. You must unmount a MicroSD card before you can format it.

11.8.2 Internal phone storage

Available space

Touch to display the amount of internal phone storage used by the operating system, its components, applications (including those you downloaded), and their permanent and temporary data.

If a warning message comes up saying that phone memory is limited, you are required to free up space by deleting some unwanted applications, downloaded files etc.

11.9 Search

You use the Search settings to configure Google Search, Quick Search Box, and the data on the phone that you want to include in searches.

11.9.1 Web Search

Google Search settings

Touch to adjust a range of settings to show web suggestions from as you type, to view and manage search history if any.

11.9.2 Quick Search Box

Searchable items

Touch to open a screen where you can check and uncheck the kind of data to include in phone searches.

Clear search shortcuts

Touch to erase the list of search results that you touched below Search Box.

11.10 Language & keyboard

Use the Language & Keyboard settings to select the language for the text on your phone and for configuring the onscreen keyboard, including words that you've added to its dictionary.

11.10.1 Select Locale

Touch to select language and region you want.

11.10.2 Android keyboard

For phones with physical keyboards, unmark to disable the onscreen keyboard.

The Android keyboard settings apply to the onscreen keyboard that is included with your phone. The correction and capitalization features affect only the English version of the keyboard. Available options are as follows:

• **Vibrate on keypress**

Mark the check box to have the phone vibrate briefly each time you touch a key on the onscreen keyboard.

• **Sound on keypress**

Mark the check box to play a brief sound each time you touch a key on the onscreen keyboard.

• **Auto-capitalization**

Mark the check box to have the onscreen keyboard automatically capitalize the first letter of the first word after a period, the first word in a text field, and each word in name fields.

• **Quick fixes**

Correct commonly typed mistakes.

• **Show suggestions**

Display suggested words while typing.

• **Auto-complete**

Spacebar and punctuation automatically insert highlighted word

11.10.3 User dictionary

Touch to open a list of the words you've added to the dictionary a word to edit or delete it. Press **Menu** key and touch **Ad** word.

11.11 Accessibility[(1)]

You use the Accessibility settings to configure any accessibility have installed on your phone.

Accessibility

Mark the check box to enable all installed accessibility plug-ins.

KickBack

Mark the check box to have the phone vibrate briefly as feedba navigate the user interface, press buttons, and so on.

TalkBack

Mark the check box to have an installed speech synthesize labels or names of items as you navigate the phone's user inter

SoundBack

Mark the check box to play a sound as you navigate to the phor interface.

[(1)] Availability depending on your country and network operator.

11.12 Date & time

Use Date & Time settings to customize your preferences for how date and time are displayed.

Automatic

Mark the check box to use network-provided values. Or unmark to set all values manually.

Set date

Touch to open a dialog where you can manually set the phone's date.

Select time zone

Touch to open a dialog where you can set the phone's time zone.

Set time

Opens a dialog where you can set the phone's time.

Use 24-hour format

Mark the check box to display the time using 24-hour clock format.

Select date format

Touch to open a dialog where you can select the format for displaying dates.

11.13 Schedule power on/off

You can use **Schedule power on/off** to set your phone to power on/off. Mark the check box to activate the action.

11.14 About phone

Actually this contains information about a lot of things ranging from information, Model number, Firmware version, Baseband version, version, Build number to those listed below:

Status

This contains the status of the Battery charging level, My phone Network, Signal strength, Mobile network type, Service stat Mobile network state, IMEI, IMEI SV, Wi-Fi MAC address, Bl address, Up time.

Battery use

Touch to open a list of the applications and operating system co you have used since you last connected the phone to a p sorted by the amount of power they have used. Touch an applic list to view details about its power use and, if available, touch a open a settings or information screen for that component or ap

Legal information

12 Making the most of your phone ....

12.1 PC suite

You can download software upgrade for free from the website: www.alcatelonetouch.com. The PC suite includes:

• **Contacts**

It allows you to back up contact entries so that you don't have to worry about losing, breaking, switching phone or changing service providers.

• **Messages**

It frees you from painstakingly inputting text on the keypads. All of your messages are easily accessible and well-organized.

• **Photos**

It allows you to easily import photos from PC or the handset and organize them in different albums for better management.

• **Videos**

It allows you to insert video files from PC for playback and then upload to handset folder.

• **Music**

It allows you to quickly search your favorites in PC, manage the ultimate Library, and enjoy the easiest digital jukebox in your own mobile way.

• **Application**

It allows you to import downloaded mobile applications and have them installed into your handset upon synchronization.

• **File**

It allows you to organize Handset files with just a few clicks and the Handset can be at where you want them to be.

• **Sync**

It allows you to synchronize the Contacts and Calendar in Outlook Express and handset.

Supported Operating Systems

Windows XP/Vista/Windows 7.

12.2 One Touch Upgrade

Using One Touch Upgrade tool you can update your phone from your PC.

Downloading One Touch Upgrade from ALCATEL website (http://alcatelonetouch.com/) and install it on your PC. Launch the update your phone by following the step by step instructions (re User Guide provided together with the tool).

Your phone's software will now have the latest software.

All personal information will be permanently lost foll update process. We recommend you backup your person using PC Suite before upgrading.

13 Telephone warranty......

Your phone is warranted against any defect or malfunctioning which may occur in conditions of normal use during the warranty period of twelve (12) months [1] from the date of purchase as shown on your original invoice.

Batteries [2] and accessories sold with your phone are also warranted against any defect which may occur during the first six (6) months [1] from the date of purchase as shown on your original invoice.

In case of any defect of your phone which prevents you from normal use thereof, you must immediately inform your vendor and present your phone with your proof of purchase.

If the defect is confirmed, your phone or part thereof will be either replaced or repaired, as appropriate. Repaired phone and accessories are entitled to a one (1) month warranty for the same defect. Repair or replacement may be carried out using reconditioned components offering equivalent functionality.

This warranty covers the cost of parts and labor but excludes any other costs.

---

[1] The warranty period may vary depending on your country.
[2] The life of a rechargeable mobile phone battery in terms of conversation time standby time, and total service life, will depend on the conditions of use and network configuration. Batteries being considered expendable supplies, the specifications state that you should obtain optimal performance for your phone during the first six months after purchase and for approximately 200 more recharges.

135

This warranty shall not apply to defects to your phone and/or accessory due to (without any limitation):

1) Non-compliance with the instructions for use or installation, or with technical and safety standards applicable in the geographical area where your phone is used,

2) Connection to any equipment not supplied or not recommended by TCT Mobile Limited,

3) Modification or repair performed by individuals not authorised by TCT Mobile Limited or its affiliates or your vendor,

4) Inclement weather, lightning, fire, humidity, infiltration of liquids or foods, chemical products, download of files, crash, high voltage, corrosion, oxidation...

Your phone will not be repaired in cases where labels or serial numbers (IMEI) have been removed or altered.

There are no express warranties, whether written, oral or implied, other than this printed limited warranty or the mandatory warranty provided by your country or jurisdiction.

In no event shall TCT Mobile Limited or any of its affiliates be liable for indirect, incidental or consequential damages of any nature whatsoever, including but not limited commercial or financial loss or damage, loss of data or loss of image to the full extent those damages can be disclaimed by law.

Some countries/states do not allow the exclusion or limitation of indirect, incidental or consequential damages, or limitation of the duration of implied warranties, so the preceding limitations or exclusions may not apply to you.

136

14 Accessories [1] ....

The latest generation of Alcatel GSM mobile phones offers a built-in handsfree feature that allows you to use the telephone from a distance, placed on a table for example. For those who prefer to keep their conversations confidential, an earpiece is also available known as the headset.

Standard charger
UK charger

Battery

USB cable

Stereo headset

Only use your telephone with the Alcatel batteries, chargers and accessories in your box.

15 Troubleshooting............

Before contacting the aftersales department, you are advised to follow the instructions below:

• You are advised to switch off the phone from time to time to maintain performance.
• You are advised to fully charge the battery for optimal operation.
• Avoid storing large amounts of data in your phone as this may affect the performance of your phone.

and carry out the following checks:

My mobile phone can not switch on
• Press until the screen comes on
• Check the battery charge level
• Check the battery contacts, remove and reinstall your battery, then turn your phone back on

My mobile phone has not responded for several minutes
• Press the key
• Remove the battery and re-insert it, then switch the phone back on

My mobile phone turns off by itself
• Check that your keypad is locked when you are not using your mobile phone
• Check the battery charge level

My mobile phone will not charge properly
• Make sure you are using an Alcatel battery and charger provided
• Make sure your battery is inserted. It must be inserted before plugging in the charger
• Make sure that your battery is not completely discharged; If the battery is flat, it may take around 20 minutes to display the battery charger indicator on the screen
• Make sure charging is carried out under normal conditions (0°C -)
• When abroad, check that the electrical current is compatible

My mobile phone can not connect to a network
• Try connecting in another location
• Verify the network coverage with your operator
• Check with your operator that your SIM card is valid
• Try selecting the available network(s) manually
• Try connecting at a later time if the network is overloaded

SIM card error
• Make sure the SIM card has been correctly inserted
• Verify with your operator that your SIM card is 3V, 1.8V compatible; the old 5V SIM cards cannot be used
• Make sure the chip on your SIM card is not damaged or scratched

Touch screen does not respond
• Make sure your phone is not locked.
• Launch touch screen calibration (Touch Application tab, and select **TSCalibration**)

Unable to make outgoing calls
• Make sure you have dialled a valid number and press the
• For international calls, check the country and area codes
• Make sure your mobile phone is connected to a network, and that the network is not overloaded or unavailable
• Check your subscription status with your operator (credit, SIM card validity, etc.)

Unable to receive incoming calls
• Make sure your mobile phone is switched on and connected to a network (check for overloaded or unavailable network)
• Check your subscription status with your operator (credit, SIM card validity, etc.)
• Make sure you have not forwarded incoming calls
• Make sure that you have not barred certain calls

The caller's name or number does not appear when a call is received
• Check that you have subscribed to this service with your operator
• Your caller has concealed his/her number

I cannot find my contacts
• Make sure your SIM card is correctly inserted
• Import all contacts stored in SIM card to phone

The sound quality of the calls is not optimal
• You can adjust the volume during a call by means of the **Volume** key
• Check the signal strength level

I am unable to use the features described in the manual
• Check with your operator to make sure that your subscription includes this service

I am unable to add a contact to my directory
• Make sure that your phone memory is not full; delete some contacts or save the contacts in the phone directory (i.e. your professional or social directories)

My callers are unable to leave messages on my voicemail
• Contact your network operator to check service availability

I cannot access my voicemail
• Make sure your operator's voicemail number is correctly entered
• Try later if the network is busy

I am unable to send and receive MMS
• Check your phone's available memory as it might be full
• Contact your network operator to check service availability and check MMS parameters
• Verify the server centre number or your MMS profile with your operator
• The server centre may be swamped; try again later

"No service" is displayed
• You are outside of the network coverage area

I have already entered 3 incorrect PIN codes
• Contact your network operator to obtain the PUK code (Personal Unblocking Key)

I am unable to connect my phone to my computer
- Install Alcatel's PC suite first of all
- Open Notification panel to check if the PC Suite Agent has activated
- Check that you have marked the checkbox of USB debugging in **Settings\ Applications\Development\USB debugging**
- Check that your computer system meets the requirements for Alcatel's PC Suite installation

I am unable to download new files
- Check for free space of your MicroSD card
- Delete some files
- Check your subscription status with your operator

The phone can't be detected by others via Bluetooth
- Make sure that Bluetooth is turned on and your mobile phone is visible to other users

How to make your battery last longer
- Make sure you followed the complete charge time (minimum 3 hours)
- After a partial charge, the battery level indicator may not be exact. Wait for at least 20 minutes after removing the charger to obtain an exact indication
- Switch on the backlight upon request
- Extend email auto-check interval as long as possible
- Exit background-running applications if they are not being used for a long time
- Deactivate Bluetooth, Wi-Fi, or GPS when not in use

16 Specifications

Processor	Platform MTK6516
Platform	Android™ 2.1
Memory	ROM: 512 MB RAM: 256 MB
Dimensions (LxWxT)	110X58X12.55mm
Weight	Around 102 grams with battery
Display	2.8-inch TFT-LCD touchscreen with 240×3. QVGA resolution
Network	GSM/GPRS/EDGE: Quad-band 850/900/1800/1900 MHz (Band frequency and data speed are opera dependent.)
GPS	Assisted GPS/Internal GPS antenna
Connectivity	• Bluetooth 2.1 A2DP • Wi-Fi®: IEEE 802.11 b/g • 3.5 mm audio jack • Micro-USB
Camera	2.0 megapixel color camera
Audio supported formats	MP3, AAC (AAC, AAC+), AMR-NB, MIDI, Ogg vorbis

Video supported formats	MPEG-4 (playback only), H.263, H.264 (playback only)
Battery	• Rechargeable Lithium-ion battery • Capacity: 1000 mAh
Expansion Slot	MicroSD™ memory card
Special Features	• G-sensor • Digital Compass
